iPod®

Contour Lines and Digital Terrain Model (DTM)

XEOS Imaging would like to remind you that we offer the following products:

- **Digital Terrain Model (DTM)** (on bare earth)
- **Digital Elevation Model (DEM)** (with vegetation, buildings, etc.)
- **Contour Lines**

These products are produced from XEOS® aerial imagery or LIDAR surveys. The vertical accuracy will be dependant on the type of data it is produced from and can reach 3 inches (8 cm).

Do not hesitate to contact us and discuss the best solution suited to your specific project requirements.

Projects in South?

XEOS Imaging is presently working in the **South of the United States**.

Do you have any projects in the area?

Contact us to take advantage of potential cost reductions.
