

XEOS Imaging and the LIDAR Technology at your service

XEOS offers a full range of airborne LASER mapping services, more commonly called LIDAR (Light Detection and Ranging). With an elevation accuracy as good as 3 inches (7 cm) and a point density of up to 40 points per square meter, XEOS' LIDAR technology offers:

- **Digital Elevation Models (DEM)** ;
- **Elevations Contours** with intervals from 25 cm and higher;
- **Vectorization and Feature Extraction** from the LIDAR data (buildings, water bodies, vegetation, streets, etc.).

Contact us to find out how XEOS' LIDAR technology can help you manage your projects.

XEOS Imaging to Attend the 2008 GITA Conference

XEOS Imaging will once again attend the GITA, GIS for Oil & Gas conference taking place in Houston, Texas. The trade show is going on from September 21 to 24, 2008 at Marriott Westchase Hotel on 2900 Biarkpark Drive.

For the last several years, the GITA conference has been the event for sharing geospatial information applied to the Oil & Gas market.

We invite you to drop by **booth 108** to meet our Houston team. XEOS will be presenting its complete range of digital airborne imagery solutions for the Oil & Gas market. We look forward to seeing you in Houston this September.
