

# XEOS XPRESS

NEWSLETTER NOVEMBER - DECEMBER 2007

## Major Pipeline Project for XEOS Imaging

In a record time of five (5) months, between March and August 2007, XEOS delivered 800 miles of Ortho Mosaics and LIDAR for major pipeline project taking place in Wisconsin and Illinois.

The customer was delighted with the accuracy and quality of the data, respect for the strict delivery schedule and flexibility displayed by the XEOS Imaging team throughout the project.

The benefits enumerated by the customers were the followings:

- Unmatched flexibility by capturing all possible routes in one flight mission and processing only the selected ones;
- Significant and tangible cost reduction versus traditional ground survey;
- Provided a more detailed topographic survey;
- Expedited the design and alignment drawing process;
- Eliminated the need to gain survey permissions on properties;
- Improved the ROW planning;
- Presented the key elements for the environmental studies (before and after impacts, wetlands and water bodies).

The XEOS Imaging team in Houston was instrumental in the success of the project. Furthermore, this accomplishment highlights the importance of the Houston office in XEOS Imaging's strategic positioning in the region and in the oil & gas market.

## Half a Million Images: A big step for XEOS

Last October, XEOS Imaging reached a significant milestone by capturing more than half a million high resolution digital XEOS® images in North America.

Thanks to our customers: It's only the beginning!

## Visit us in Houston

Founded two years ago, our Houston office has grown rapidly with a dedicated focus on the energy corridors market.

Please make note of our new location :

5906 Dolores Street  
Suite #150  
Houston, TX 77057  
USA

Phone : 1-866-215-4708  
Fax : (888) 941-0001

## Highlights from our next edition :

Introducing Dr. Wang : XEOS Imaging's  
Ph. D in PE&RS
